

Radha Pingle

Pittsburgh, PA | 973-981-7814 | rpingle@andrew.cmu.edu | radhapingle.github.io/personal-website

SUMMARY

Cognitive Science student concentrating in Human-Computer Interaction, with UX research experience across think-aloud interviews, usability testing, survey analysis, human-subjects study design, and competitive analysis, plus a technical background in Python, SQL, and React.

EDUCATION

Carnegie Mellon University Pittsburgh, PA
B.S. Cognitive Science, Concentration in Human-Computer Interaction; Minor in Information Systems Expected May 2028
GPA: 3.40. Quantitative Social Science Scholar (QSSS Program). Relevant Coursework: Designing Human-Centered Software, Introduction to Research Methods, Cognitive Psychology, Human Information Processing & AI, Probability & Statistical Inference I, Principles of Imperative Computation

EXPERIENCE

PhysaFlow Remote
User Experience & Product Associate August 2026 – Present

- Developed and iterated 4+ design concepts across stakeholder review rounds, shaping product positioning and UX direction.
- Benchmarked 10+ AI infrastructure competitors to identify market gaps and differentiation opportunities, converting the analysis into product strategy recommendations.

Laboratory for Computational Perception Pittsburgh, PA
Research Assistant May 2026 – Present

- Expanded a labeled natural-sound dataset 260%, from 275 to 1,000+ validated samples, building the stimulus set for an upcoming fMRI study on how humans and models differ in categorizing sound.
- Built a Python pipeline to curate, clean, and validate 275+ audio clips, standardizing stimuli across human-model comparison experiments.
- Designed and ran a binary-response human-subjects experiment with 15 participants, validating 167 LLM-generated sound subcategories against their parent categories.

Kid Neuro Lab Pittsburgh, PA
Research Assistant May 2026 – August 2026

- Ran sessions with child participants across 3 concurrent studies, managing scan setup, participant flow, and protocol adherence.
- Processed and quality-checked structural and functional fMRI data for 5 participants, flagging motion artifacts before analysis.

Epistemix Remote
Data Science / Product Intern May 2025 – August 2025

- Led 7 think-aloud user interviews and analyzed 15 survey responses across 5 rounds of design and testing, producing 10+ prioritized product and UX recommendations.
- Designed and built an end-to-end conversational interface (React, JavaScript, Gemini 1.5 Flash) spanning 10+ user flows, turning research-backed recommendations into a testable product.
- Constructed a structured mock dataset across 2 ZIP codes and executed 5 test scenarios to evaluate AI response quality, surfacing usability inconsistencies ahead of launch.

Carnegie Mellon University Remote
Website Manager November 2024 – August 2025

- Redesigned information architecture across 5+ pages with a faculty stakeholder, improving navigation and content findability.
- Implemented 30+ site updates, balancing competing stakeholder priorities against usability standards.

LEADERSHIP

Delta Delta Delta Carnegie Mellon University
Director of Public Relations & Marketing April 2026 – Present

- Directed social media and visual campaign strategy, producing 39 pieces of content that earned 52.9K views and 1.4K interactions.

PROJECTS

Language Model Analysis | Python October 2024

- Trained a language model on a corpus of Grimm and Andersen fairy tales, applying statistical frequency analysis to convert unstructured text into quantifiable stylistic insights.

Barista Simulation Game | Python May 2025

- Built a simulation with randomized recipes, priority-based scheduling, and sequencing-dependent scoring, balancing system complexity against an intuitive user experience.

SKILLS

UX Research Methods: Think-aloud protocols, user interviews, usability testing, survey analysis, human-subjects experimental design, competitive analysis, information architecture, prototyping, qualitative synthesis

Tools & Platforms: Figma, Jira, R, Excel

Programming & Data: Python, SQL, JavaScript, React, HTML, C
