

Radha Pingle

rpingle@andrew.cmu.edu • 973-981-7814

Education

Carnegie Mellon University, Pittsburgh, PA

May 2028

Bachelor of Science, Cognitive Science + Statistics and Data Science

Nominated & Selected as Quantitative Social Science Scholar (QSSS Program)

Relevant Coursework: Methods for Statistics & Data Science, Applied Quantitative Social Science Seminar I & II, Intro to Research Methods, Principles of Computing, Fundamentals of Programming & Computer Science, Principles of Imperative Computation, Cognitive Psychology

Experience

Machine Learning RA – Laboratory for Computational Perception

May 2026 – Present

- Scaled a labeled natural-sound dataset by over 260% (275 to 1,000+ validated samples) to power human and AI auditory-categorization research.
- Used Python to curate, clean, validate, and organize labeled audio clips for downstream analysis.
- Built and enforced dataset quality control by reviewing clips, refining labels, and preparing data for human–model comparison experiments.

Data Science Intern – Epistemix

May 2025 – Aug 2025

- Built a mock ZIP-code dataset and ran structured tests to evaluate model behavior and validate response consistency.
- Analyzed findings from 15 surveys and 7 user interviews, translating results into data-backed feature and prompt-design decisions.
- Built an LLM tool (“Public Health Copilot”) using Gemini 1.5 Flash to deliver ZIP-code-specific insights, iterating on quality through structured prompt changes and testing.
- Developed a React/JavaScript conversational interface and integrated it with the model via API calls.
- Translated user research findings into product improvements across prompt design and the front-end experience.

Cognitive Development Researcher – Kid Neuro Lab

May 2026 – Present

- Processed structural and functional fMRI data for 5 participants across 3 studies investigating STEM skill development in children.
- Conducted quality control checks on fMRI images, identifying motion artifacts and other scan-quality issues prior to analysis.
- Assisted with fMRI data collection for child participants, supporting scan setup, participant flow, and experimental procedures.

Research Assistant – Cognitive & Social Development Lab, CMU

May 2025 – Aug 2025

- Reviewed dozens of academic papers on how visual illustration styles shape children’s perception and implicit bias, synthesizing findings to surface research gaps.
- Designed an original experiment and hypotheses testing how facial depiction style influences race-based perception.

Website Manager – Professor Emerita, CMU

Nov 2024 – Aug 2025

- Collaborated with a faculty member to redesign and update her academic website, improving content organization, navigation, and overall clarity.
- Managed site structure and clean version updates using FileZilla, VSCode, and SFTP.

School Projects

-
- **Statistical Text Analysis (15-110)** – Trained a language model on a fairy-tale corpus (Grimm & Andersen) and quantified stylistic patterns through statistical frequency analysis.
 - **Fundamentals of Programming and Computer Science (15-112)** – Built a Python game with randomized recipes, priority-based scheduling, and sequencing-dependent scoring logic.

Technical Skills

SQL, Python (Pandas), R, Excel, Matlab, Git, Java, C++, C, HTML
