

Radha Pingle

rpingle@andrew.cmu.edu • 973-981-7814

Education

Carnegie Mellon University, Pittsburgh, PA

May 2028

Bachelor of Science, Cognitive Science + Statistics and Data Science

Nominated & Selected as Quantitative Social Science Scholar (QSSS Program)

Relevant Coursework: Methods for Statistics & Data Science, Applied Quantitative Social Science Seminar I & II, Intro to Research Methods, Principles of Computing, Fundamentals of Programming & Computer Science, Principles of Imperative Computation, Cognitive Psychology

Experience

Data Science / Product Intern – Epistemix

May 2025 – Aug 2025

- Owned the 0-to-1 development of “Public Health Copilot,” an LLM tool (Gemini 1.5 Flash) delivering ZIP-code-specific insights, iterating on response quality through structured prompt changes and testing.
- Drove product decisions by deploying 15 surveys and conducting 7 user interviews, translating findings into concrete feature and prompt-design changes.
- Built a mock ZIP-code dataset to test model behavior and validate response consistency before release.
- Developed a React/JavaScript conversational interface and integrated it with the model via API calls.
- Translated user research findings into product improvements across prompt design and the front-end experience.

Research Assistant – Cognitive & Social Development Lab, CMU

May 2025 – Aug 2025

- Reviewed dozens of academic papers on how visual illustration styles shape children’s perception and implicit bias, surfacing key research gaps to inform product direction.
- Designed an original experiment and hypotheses testing how facial depiction style influences race-based perception, scoping the problem from an open research question.

Website Manager – Professor Emerita, CMU

Nov 2024 – Aug 2025

- Partnered with a faculty stakeholder to redesign and update her academic website, prioritizing changes that improved content organization, navigation, and overall clarity.
- Managed site structure and clean version updates using FileZilla, VSCode, and SFTP.

Machine Learning RA – Laboratory for Computational Perception

May 2026 – Present

- Scaled a labeled natural-sound dataset by over 260% (275 to 1,000+ validated samples) to power human and AI auditory-categorization research.
- Used Python to curate, validate, and organize short audio clips with category labels.
- Support dataset quality control by reviewing sound clips, refining labels, and preparing data for human–model comparison experiments.

Cognitive Development Researcher – Kid Neuro Lab

May 2026 – Present

- Processed structural and functional fMRI data for 5 participants across 3 studies investigating STEM skill development in children.
- Conducted quality control checks on fMRI images, identifying motion artifacts and other scan-quality issues prior to analysis.
- Assisted with fMRI data collection for child participants, supporting scan setup, participant flow, and experimental procedures.

School Projects

- **Principles of Computing (15-110)** – Trained a language model on Grimm & Andersen fairy tales and evaluated stylistic patterns through statistical frequency analysis.
- **Fundamentals of Programming and Computer Science (15-112)** – Built a Python game with randomized recipes, priority-based scheduling, and sequencing-dependent scoring logic.

Technical Skills

Python, R, SQL, React, JavaScript, HTML, Java, C++, C, Git, Figma, Matlab
